PROFILE

TCE Series

Rigid and highly flexible modular enclosure series for versatile application. Ideally suited for Industrial automation / Drives / Power transmission and distribution / Special purpose machines.

TCE Series offers IP66-IK10 protection for single door enclosure and IP65-IK10 protection for double door enclosure.

Robust profile with 25mm hole pattern and joined together with uniform diagonal accuracy. Door and covers protect dust and water by highly resilient foamed PU gasket. The Mounting plate with high load bearing capacity is depth adjustable with sliding provision.

Material of TCE Series Enclosure

Frame: 2.0mm Painted Steel

Door: 2.0mm Painted Steel

Rear, Top and Side panes: 1.6mm painted steel

Mounted Plate: 3.0mm painted steel/3.0mm GI on request

Bottom Gland Plate: 2.0mm Galvanized Steel

Surface finish: RAL-7035 to enclosure and
RAL-2000 to mounting plate

The Design incorporate user friendly features

- Removable Door and covers
- Door with Interchangeability features (LHS/RHS)
- 4point locking for doors
- Separate locking at LHS door with swing handle for Double door
- Bolted Stiffener for door with powder coating
- 3-Part Gland plate
- Eye bolt for lifting
- Modular plinth (optional) 100mm Height
- Side panel (optional) removable type

THE MANUFACTURING PROCESS

Our state-of-the-art suitably augmented manufacturing infrastructure, produces enclosures that excel to height quality with cost effectiveness. Our focus is on strong infrastructure, high efficiency and consistent quality.

- High quality CRCA (branded) steel sheets
- 3D software used to design the products
- Superior servo drive punching and machine
- CNC machines are supported by 3D compatible software, which enables CAD to CAM manufacturing for customized products
- CNC bending machines with very high degree of accuracy, reproducibility & repeatability
- The fabrication process designed with TIG, MIG, spot and Pulse welding ensures strong structures
- Fully automatic and eco-friendly powder coating plant
- 10-Tank pre-treatment is done using spray jets and cascade rinsing, which ensures optimized usage of chemicals
- Tri-cationic zinc phosphating for higher salt spray life
- The door panels are processed with foam gasketing - made from Poly Urethane polymer for long life
